The Flexible City: Solutions for a circular and climate adaptive Europe

Friday 24 November 2023

12:00 -13:00 CEST

Via MS Teams

The SURE Eurodelta presents best practices to boost the transition to a circular built environment.

Across Europe, cities are struggling with an accumulation of environmental crises such as global warming, the depletion of natural resources, pollution and the extinction of plant and animal species. If we want to keep our cities livable, they must become circular and climate-adaptive.

The Flexible City presents a toolbox for successfully implementing circularity and climate adaptation in our cities. Using a network of local reporters, authors Tom Bergevoet and Maarten van Tuijl compare European cities, identify similarities and trends and describe in detail tools and successful examples.

Tom Bergevoet

Architect, Temp Architecture Urbanism |
Author, The Flexible City

Bas Horsting

Senior Advisor Sustainable
Area Development, Circular
Built Environment |
The City of Amsterdam

Maarten van Tuijl

Architect, Temp Architecture Urbanism |
Author, The Flexible City
